in the international search report.

Documents 1 and 2 do not indicate that both components A and B and/or component C are added while a polymer is polymerized until the completion of cooling after the reaction is complete; and that both components A and B and/or component C are mixed in while a polymer is kneaded, and these features offer the invention of this application the advantageous effect that a polytrimethylene terephthalate composition is obtained with a suppressed generation of acrolein, a harmful substance, which is generated during thermal oxidation.

Claim 14

The invention set forth in claim 14 involves an inventive step in relation to documents 1 and 2 cited in the international search report.

Documents 1 and 2 do not indicate that a fiber or molded product contains a polytrimethylene terephthalate composition containing both components A and B and/or component C, and said feature offers the invention of this application the advantageous effect that generation of acrolein, a harmful substance, is suppressed during thermal oxidation.
